To whom it may concern, Please do not allow this ridiculous petition 04-160 by the NAB to pass. XM Radio provides a very valuable service to millions of listeners, valuable enough that us as listeners pay for it, when we could just as easily listen to regular radio for free. The NAB has no right to try to keep XM radio from offering any or all of the value added services that they offer, such as traffic and weather reports, especially when we as listeners pay for those services. This petition should be viewed as monopolistic and not in the interest of competition through which we as consumers benefit.

Sincerely,
Mike Odling
XM Subscriber
